

## A few words about myself

Steven Marcel Bißantz, University of Koblenz-Landau  
Fall Retreat 2022, November 25 – 26, Ludwigshafen

# Curriculum Vitae

## Education

since 2022 SMiP Associate

(University of Koblenz-Landau)

since 2021 Ph.D. Candidate, Psychology

(University of Koblenz-Landau)

2019-2021 M.A., Social Sciences

(University of Koblenz-Landau)

2014-2018 B.A., Sociology

(University of Mannheim)

(University of Mannheim)

Figure: Possibilities for further research and new developments

# Research & Personal Interests

## Research interests

primary Meta-research

primary Statistical modeling

primary Statistical computing

secondary Do-calculus

secondary Missing data

# Research & Personal Interests

## Research interests

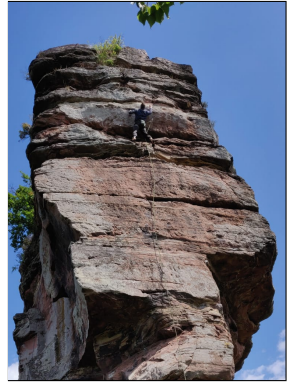

primary Meta-research

primary Statistical modeling

primary Statistical computing

secondary Do-calculus

secondary Missing data

**Figure:** Personal Interest – climbing in the Alsatian sandstone

# Measurement & Replicability

**Research question:** What is the role of item-based measurement in the replicability of empirical findings?

# Measurement & Replicability

**Research question:** What is the role of item-based measurement in the replicability of empirical findings?

**Focus:** Direct replications

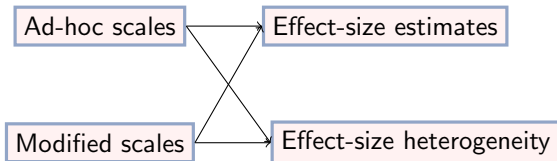

# Measurement & Replicability

**Research question:** What is the role of item-based measurement in the replicability of empirical findings?

**Focus:** Direct replications

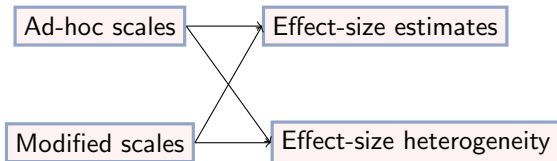

# Measurement & Replicability

**Research question:** What is the role of item-based measurement in the replicability of empirical findings?

**Focus:** Direct replications

**Scope:** 3 projects (experiment, simulation, [pending])

# Acknowledgments

This research was funded by the Deutsche Forschungsgemeinschaft (DFG), grant 2277, Research Training Group “Statistical Modeling in Psychology” (SMiP)
